4. Safety & Warnings

Prohibited use scene: please absolutely prohibit using on wet surfaces such as glass walkway with water, smooth marble floor, tile floor, etc. The anti slip effect of silicone material will sharply decrease on such surfaces when exposed to water, which can easily lead to slipping and falling injuries!

Applicable environment: This product is designed for outdoor walking on rainy days,

such as asphalt roads, cement floors, and other roads with normal friction.

Inspection and maintenance: Before each use, please check whether the shoe cover is damaged, torn, or aged (such as material becoming brittle or stuck). If there is any damage, please stop using immediately.

Cleaning and Storage: After use, rinse with clean water and let it dry naturally in the shade. Avoid exposure to direct sunlight, fire, or contact with sharp objects. Please store in a cool and shady place after drying.

5. Usage Instructions

Preparation: Ensure that there is no obvious dirt or sharp objects on the surface of the shoes to prevent puncturing the shoe cover.

Open the shoe cover: Use both hands to open the mouth of the shoe cover, making it loose enough for penetration.

Insert shoes: Align the toe of the shoe with the front end of the shoe cover and slowly push the entire shoe into the shoe cover.

Organize and adjust: Pull down the shoe sleeve to ensure complete coverage of the shoe upper. Organize the bottom of the shoe cover to fit snugly with the sole.

Check and confirm: After wearing, check if everything fits snugly to ensure there are no excessive wrinkles or distortions.
