

Instruction manual of voltage protector

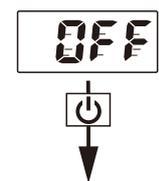

Technical parameter

Input voltage 140~300V 50/60Hz

Function	Technical parameter	Default	Technical parameters
Over-voltage protection value	230-300V	260V	Recovery voltage low 5V
Under-voltage protection value	140~210V	175V	Recovery voltage high 5V
Recovery delay time	5~999S	10S	
Voltage correction value	-20~20V	0	

Operating Instructions:

Press the "▲" and "▼" keys to adjust the value
 Press the "▲" and "▼" keys simultaneously for 2 seconds to restore factory settings

- Press the "⏻" key to turn off the socket power output

Product setting:

U 230

SET

H 260

- Voltage display

- Over-voltage protection value V
230 ~ 300 → OFF
 OFF : Turn off over-voltage protection function.

- Under-voltage protection value V
OFF → 140 ~ 210
 OFF : Turn off the under-voltage function.

- Recovery delay time S
5 → 999

- Voltage correction value V
-20 → 20
