### Installation

1. Insert the memory card
- Warm Tips : A Class 10 or above memory card is highly recommended. Please format sd card before insert into dash cam. Do not pull out or insert the memory card when the driving recorder is turned on to avoid damage.
2. Attach the camera to a suitable position on the front windshield.

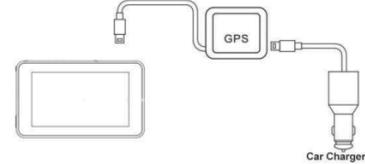

3. Adjust the viewing angle accordingly
  4. Connect the USB power cable into the type-C USB power port of Dash Cam, then plug the car charger into the cigarette lighter of your car.
  5. Connect the rear camera with the extension cable into Dash Cam to check whether the rear camera works well.
  6. Install the Rear Camera (need to buy rearview camera)
- Install the rear camera on the rear windshield. The installation is easier.

9

### GPS Function Introduction

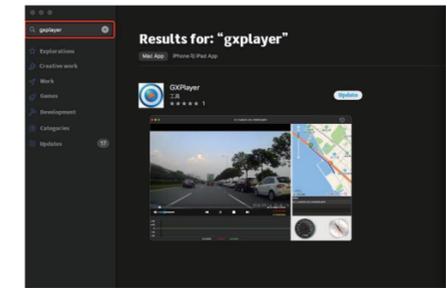

- Connect GPS module (need to buy extra)**
- ▶ After a successful GPS connection, the speed icon on the dashcam will turn green.
  - ▶ Watch GPS videos on your computer.

1. Windows System: Just insert the TF card into the computer.
2. Select the GPS player installation package. Unzip and install on your PC to watch videos with GXPlayer.

3. IOS System: Install GXPlayer APP, then you can watch videos directly on your MacBook.

10

- 4.Cell phone:
- Connect your phone to the dashcam's wifi.
  - Enter the "Viidure" APP.
  - Enter APP photo album.
  - Select a video: download to the phone's local photo album.
  - Exit video recording and go to "Local Files" in APP.
  - Downloaded videos can be viewed with WiFi turned off.
- Tips on GPS usage:

- 1.Factors Affecting GPS Signals:
  - Other signal interference in the car.
  - Severe weather (rainstorm or snowstorm. etc).
  - In tunnels with weak signal or in remote mountalnousareas.
- 2.GPS video must be installed with a dedicated player (GXPlayer) to view.
- 3.To view GPS videos in the mobile APP, you must first download these videos to local files
