4. Safety & Warnings

The disinfection bag is for single use only. Do not reuse to avoid cross-contamination.

Do not place items sensitive to high temperatures or ozone in the bag, as this may cause damage.

Do not open the disinfection cabinet during operation to prevent ozone leakage, which may cause discomfort.

Store the product in a cool, dry, and ventilated place, away from direct sunlight.

Keep out of reach of children to prevent accidental ingestion or other hazards.

5. Usage Instructions

Place Items: Put the nail tools (e.g., nail clippers, cuticle pushers, nail files) and small beauty instruments to be disinfected into the bag. Avoid over-stacking to ensure full exposure to UV light and ozone.

Seal the Bag: Fully seal the bag opening to prevent ozone leakage, which may affect disinfection effectiveness.

Disinfection Operation: Place the sealed bag into a compatible high-temperature disinfection cabinet. Set the disinfection time and mode according to the cabinet's instructions, and let UV light and ozone work together for disinfection.

Remove and Use: After disinfection, wait for the cabinet to stop working, open the door, take out the bag, and use the disinfected tools.
